INTERNSHIPS

Angular Developer, Scrutiny Software solutions pvt limited

11/2023 - 12/2023

As an Angular Developer two months Intern at Scrutinysoft, I played a pivotal role in contributing to the development and enhancement of web applications using Angular. Collaborating with a dynamic team of developers, I gained hands-on experience in translating design concepts into interactive and responsive user interfaces.

Worked closely with the development team to integrate new features and functionalities, contributing to the overall success of projects. Maintained open communication to ensure a cohesive and efficient workflow

CERTIFICATION

Frontend Developer,Uniq technology

- As a Certified Angular Developer, I possess an in-depth understanding of Angular's component-based architecture, routing, forms, and state management. These certifications reflect my expertise in creating robust and scalable Angular applications, optimizing web performance, and delivering seamless user experiences. My knowledge extends to advanced topics like server-side rendering (SSR), lazy loading, and reactive programming with RxJS. With a proven track record of achieving certification milestones, I am dedicated to excellence in Angular development. I am well-prepared to contribute to innovative projects and collaborate effectively with teams to build cutting-edge web applications with Angular.

PROJECT

Task Manager App

- Create a Task Manager web application using Angular that allows users to organize and manage their tasks effectively. The app should provide features like adding tasks, setting due dates, organizing tasks into categories or projects, marking tasks as completed, and filtering tasks based on their status or due date. Users should be able to register and log in to their accounts to save and access their tasks across sessions. The app should have a responsive design to ensure a seamless experience on different devices.

PERSONAL PROFILE

I am a passionate and results-driven Frontend Developer with a relentless commitment to crafting exceptional web experiences. My journey has been enriched by a transformative 3-month course in Angular, during which I honed my skills and gained hands-on experience in delivering cutting-edge web solutions.

ROLES

- Frontend Development:Designing and developing user interfaces and web applications using Angular, TypeScript, HTML,Bootstrap and CSS.Implementing responsive and mobile-friendly designs to ensure a consistent user experience across different devices.
- Component Development:Creating reusable and modular Angular components to build the user interface of the application.Handling component lifecycle events and managing componentstate effectively.
- API Integration:Integrating with backend APIs to fetch and display data on the frontend.
- Handling HTTP requests and responses using Angular's Http Client module
 - Routing and Navigation:Implementing routing to enable navigation between different pages or sections of the application.Utilizing Angular's router module to manage application navigation and state.
- State Management:Managing application state using state management libraries like NgRx or Akita (optional, but relevant forlarger and more complex applications).
